

AFA/AFFECT ANNUAL DEPARTMENT SURVEY: 2023

In 2022 and 2023, the Academic Female Finance Committee of the American Finance Association (AFFECT) collected data on the gender and race/ethnicity of faculty and PhD students in finance departments at a sample of U.S. business schools. The voluntary survey was sent to finance department chairs at the 127 U.S. business schools included in either the [2021 list of top 100 business schools by U.S. News and World Report](#) or the [2021 UT Dallas Top 100 North American Business School Ranking](#). Respondents were asked to report demographics of faculty and PhD students for the 2021-2022 and 2022-2023 academic years, respectively.

In 2022, we sent an invitation to take the survey via email on June 21, 2022 with a deadline of June 30, 2022. The deadline was then extended to July 8, 2022. A total of 58 responses were received by the extended deadline, representing a total response rate of 46%.

In 2023, we worked to improve our response rate by identifying contacts at each of the business schools in our sample. We reached out to faculty at each school and asked if they would be willing to serve as “AFFECT Liaisons”. We were able to identify liaisons for 126 of the survey schools, who agreed to distribute AFFECT announcements to their faculty and also to remind their department chairs to fill in the surveys.

In 2023, due to negotiation issues with NORC (the survey administrators), the invitations to take the survey were sent via email later, on October 31, 2023, with a deadline of December 4, 2023. On November 10th, we reached out to the liaisons and asked them to remind their department chairs to fill in the survey. We found that some of the surveys had gone into spam folders, and others had been sent to the wrong person. Although we did a search for department chairs before sending out the surveys, we learned from our liaisons that we had in some instances identified the wrong individual. Going forward, we will be reaching out to liaisons to identify their correct contact before sending out the survey.

This year, we are pleased to report that the response rate increased to 80%, with a total of 101 responses received. In the tables, we provide data on the full sample and also by school ranking. We received 42 responses from business schools in the Top 50 (based upon the average of the US News and UT Dallas ranks), and we received 59 responses from business schools with ranks below the Top 50. When we compare responses for 2022 to 2023, we include only those schools that responded in both years, so these sample sizes are small. We are hopeful that, going forward, our work with the liaisons will continue to provide a more robust response rate.

The results of the survey are summarized in the tables and figures that follow. First, we provide graphical representation of the data, followed by more detailed tables and figures. The number of observations used in the tables and figures are generally smaller than the 101 responses received due to filtering for consistent responses. The race and ethnicity categories are mutually exclusive and are based on U.S. Equal Opportunity Commission definitions. In tables summarizing faculty composition, the number of reported faculty must be greater than zero. Analogous consistency requirements are imposed for the student data.

The survey was conducted online. A sample form with survey questions is included as an appendix to this report.

FACULTY BY GENDER

Average Number of Faculty per Department (2023)

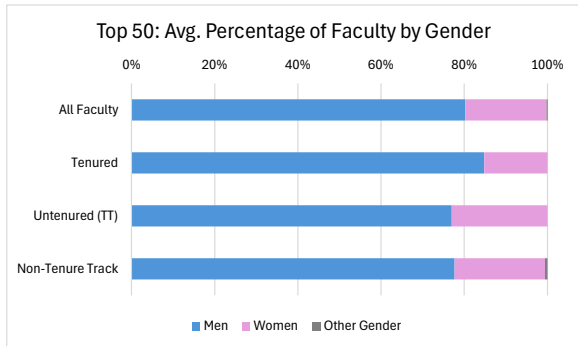

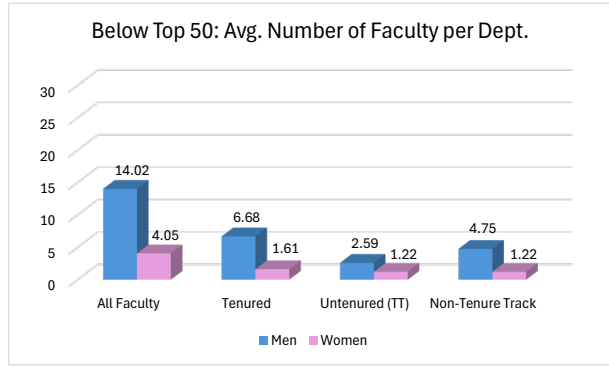

Average Percentage of Faculty by Gender (2023)

TOP 50 DEPARTMENTS:

BELOW TOP 50 DEPARTMENTS:

FACULTY BY RACE/ETHNICITY

Ph.D. Students

Ph.D. STUDENTS BY RACE/ETHNICITY

Pipeline of Women Faculty and PhD Students

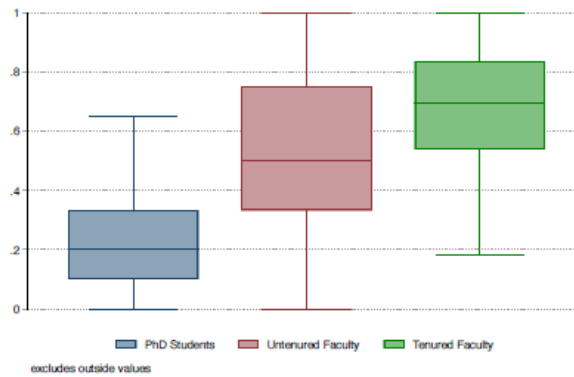

The figure shows percentages of women faculty and PhD students. Each box presents the interquartile range. The line within the box is the sample median. The top (bottom) whisker on the adjacent lines is the observation that is closest to the 75th (25th) percentile plus 1.5 times the interquartile range. Observations outside the endpoints of adjacent lines are excluded.

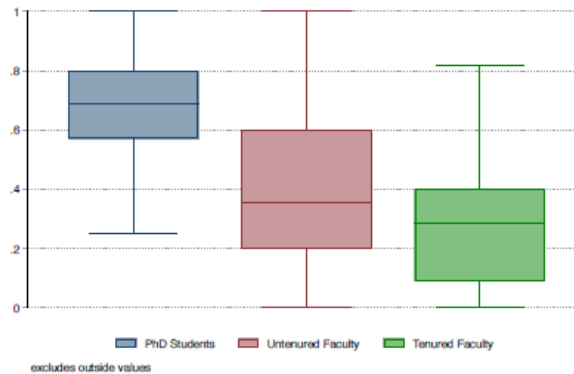

Pipeline of Faculty and PhD Students, by Race/Ethnicity

The figure shows percentages of faculty and PhD students, by race/ethnicity. Each box presents the interquartile range. The line within the box is the sample median. The top (bottom) whisker on the adjacent lines is the observation that is closest to the 75th (25th) percentile plus 1.5 times the interquartile range. Observations outside the endpoints of adjacent lines are excluded. Panel A shows White Faculty; Panel B shows Asian faculty; Panel C shows underrepresented minority faculty (the sum of Black, Hispanic, American Indian, Native Hawaiian/Pacific Islander, Two or More Races, and Other).

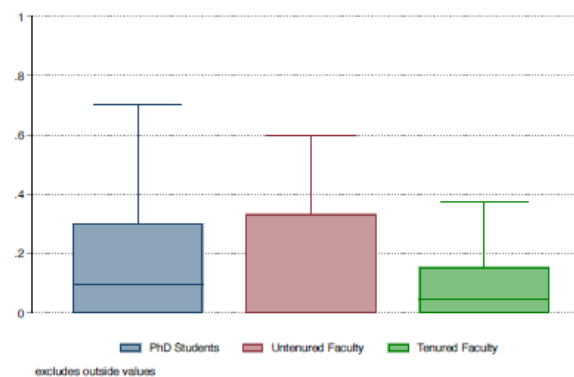

Panel A: White

Panel B: Asian

Panel C: Underrepresented Minority

AFA/AFFECT ANNUAL DEPARTMENT SURVEY: 2023

Current draft: July 22 2024

Table 1. Gender Composition of Finance Departments

This table shows the gender composition of faculty in finance departments at respondents' institutions. Panel A presents the statistics for the tenure track faculty; Panel B presents the statistics for the tenured faculty; Panel C presents the statistics for the untenured faculty; Panel D presents the statistics for all faculty. We include only those schools where gender responses are consistent (i.e., where total faculty reported equals the sum of men, women, and other gender).

⁵Percents exclude three schools with zero untenured faculty.

Table 6. Race/Ethnicity Composition of Finance Departments, Top 50

This table shows the race/ethnicity composition of faculty in finance departments at respondents' institutions for the subsample of schools ranked 1-50 ("Top 50"). Top 50 is based on the average of the US News and UT Dallas rank. If either rank is missing, the available rank is used. Panel A presents the statistics for the tenure track faculty; Panel B presents the statistics for the tenured faculty; Panel C presents the statistics for the untenured faculty; Panel D presents the statistics for all faculty. We include only those schools where race responses are consistent (i.e., where total faculty reported equals the sum of faculty in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories).

	Number of Faculty						Percent of Total Faculty (%)

Table 7. Race/Ethnicity Composition of Finance Departments, below Top 50

This table shows the race/ethnicity composition of faculty in finance departments at respondents' institutions for the subsample of schools ranked 51 and higher ("below Top 50"). Below Top 50 is based on the average of the US News and UT Dallas rank. If either rank is missing, the available rank is used. Panel A presents the statistics for the tenure track faculty; Panel B presents the statistics for the tenured faculty; Panel C presents the statistics for the untenured faculty; Panel D presents the statistics for all faculty. We include only those schools where race responses are consistent (i.e., where total faculty reported equals the sum of faculty in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories).

	Number of Faculty						Percent of Total Faculty (%)

⁷Percents exclude nine schools with no first year PhD students.

⁸Percents exclude twenty two schools with no graduating PhD students.

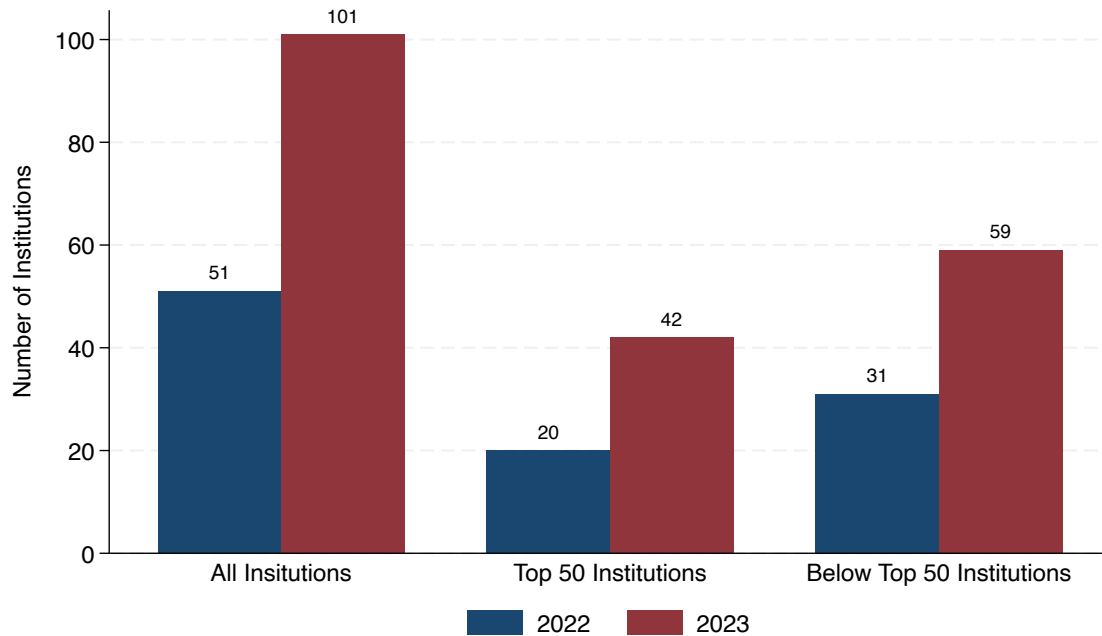

Figure 1. Number of Institutions with Effective Responses in 2022 and 2023

The figure shows the number of institutions with effective response in 2022 and 2023. The x-axis represents institution categories. The y-axis represents the number of institutions that have effective responses in the gender composition analysis. The blue bar shows the numbers for 2022, while the red bar shows the numbers for 2023. "Top 50 Institutions" and "below Top 50 Institutions" are based on the average of the US News and UT Dallas rank. If either rank is missing, the available rank is used. The institutions with effective responses must report consistent gender numbers (i.e., where the total faculty reported equals the sum of men, women, and other genders).

Figure 2. Percentages of Women Faculty in 2022 and 2023

The figure shows percentages of female faculty in 2022 and 2023. The x-axis represents the tenure track categories. The y-axis represents the average percentages of women faculty. The blue bar shows the mean values for the year 2022, while the red bar shows the mean values for the year 2023. Panel A presents the statistics for all institutions in the sample; Panel B presents the statistics for the subsample of schools ranked 1-50 ("Top 50"); Panel C presents the statistics for the subsample of schools ranked 51 and higher ("below Top 50"). "Top 50" and "below Top 50" are based on the average of the US News and UT Dallas rank. If either rank is missing, the available rank is used. We include only those schools that exist in both the 2022 and 2023 surveys and where gender responses are consistent (i.e., where total faculty reported equals the sum of men, women, and other genders).

Figure 3. Percentages of Women PhD Students in 2022 and 2023

The figure shows percentages of female PhD students in 2022 and 2023. The x-axis represents the PhD student categories. The y-axis represents the average women student percentages. The blue bar shows the mean values for the year 2022, while the red bar shows the mean values for the year 2023. We include only those schools that exist in both the 2022 and 2023 surveys and where gender responses are consistent (i.e., where the total student number reported equals the sum of men, women, and other genders).

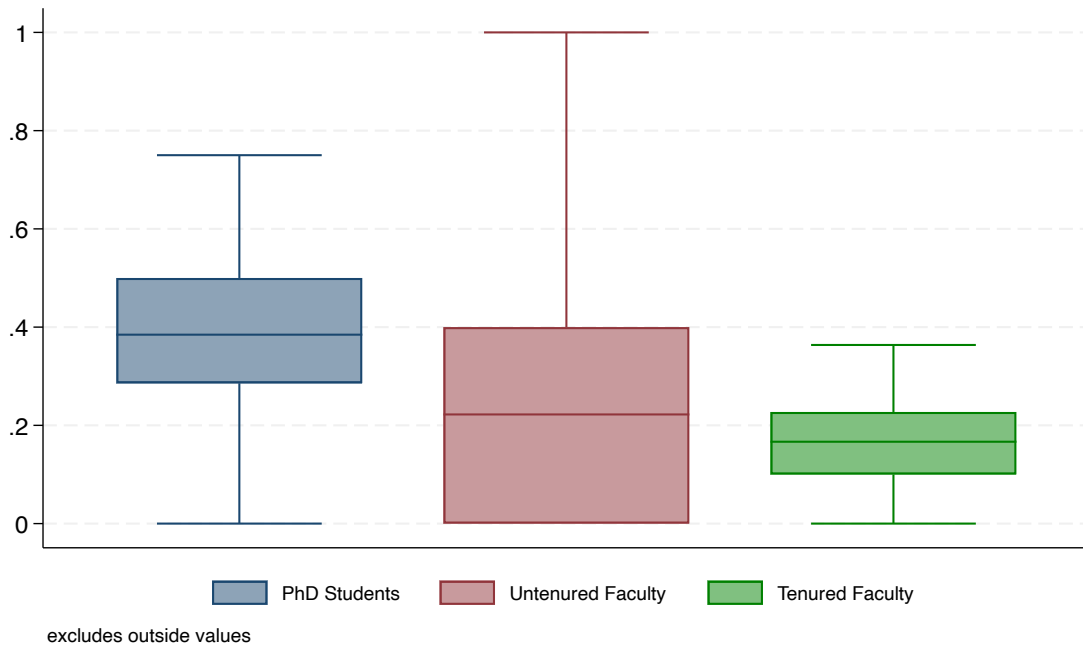

Figure 4. Pipeline of Women Faculty and PhD Students

The figure shows percentages of women faculty and PhD students. Each box presents the interquartile range. The line within the box is the sample median. The top (bottom) whisker on the adjacent lines is the observation that is closest to the 75th (25th) percentile plus 1.5 times the interquartile range. Observations outside the endpoints of adjacent lines are excluded.

Figure 5. Faculty Percentages by Race/Ethnicity Categories in 2022 and 2023

The figure shows the faculty percentage by race/ethnicity categories in 2022 and 2023. The x-axis represents the race categories. The y-axis represents the average faculty percentages. The blue bar shows the mean values for the year 2022, while the red bar shows the mean values for the year 2023. Panel A presents the statistics for the tenure track faculty; Panel B presents the statistics for the tenured faculty; Panel C presents the statistics for the untenured faculty; Panel D presents the statistics for all faculty. We include only those schools that exist in both the 2022 and 2023 surveys and where race responses are consistent (i.e., where total faculty reported equals the sum of faculty in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories). We drop the "Native" and "Pacific" categories because both years in the sample have zero values.

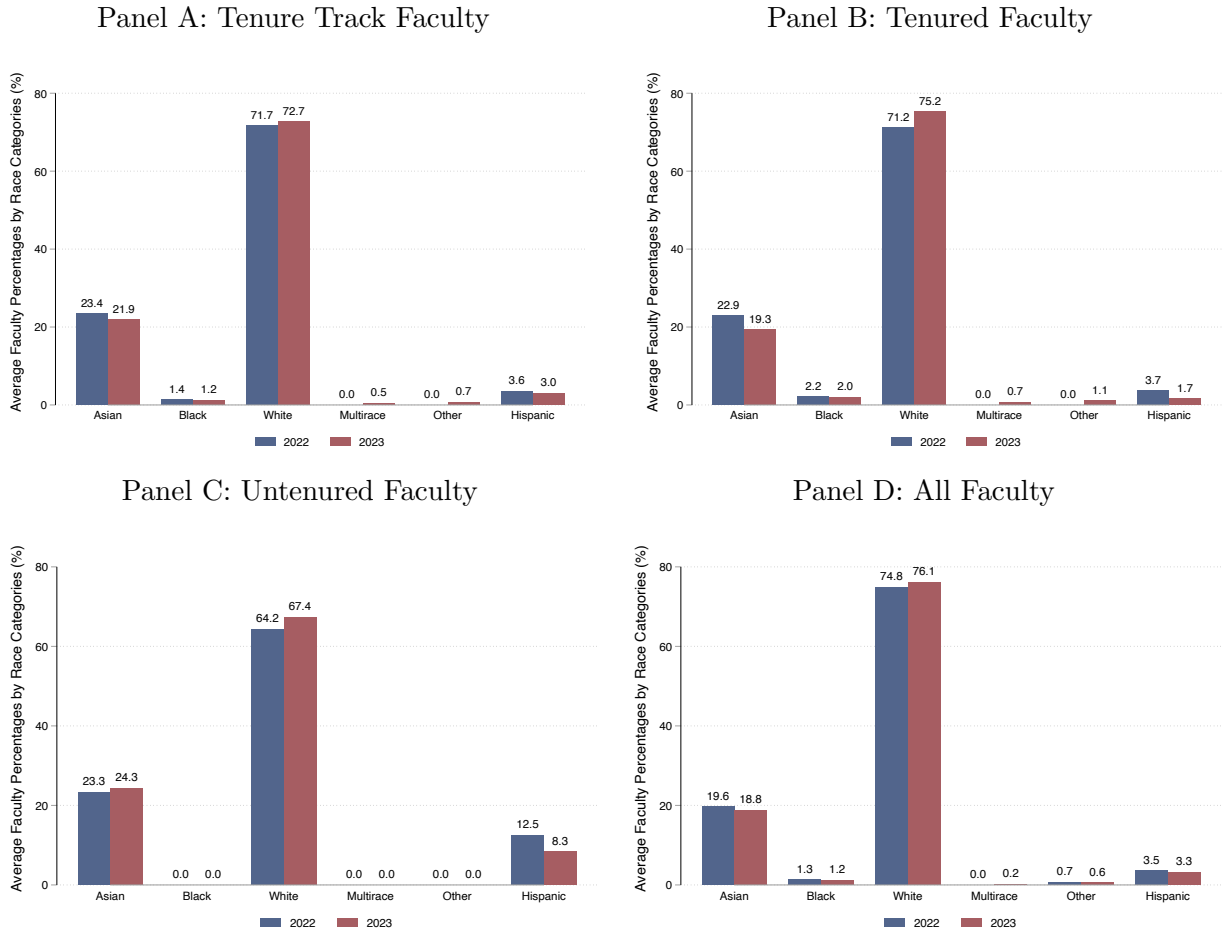

Figure 6. Faculty Percentages by Race/Ethnicity Categories in 2022 and 2023, Top 50

The figure shows the faculty percentage by race/ethnicity categories in 2022 and 2023 for the subsample of schools ranked 1-50 ("Top 50"). Top 50 is based on the average of the US News and UT Dallas rank. If either rank is missing, the available rank is used. The x-axis represents the race categories. The y-axis represents the average faculty percentages. The blue bar shows the mean values for the year 2022, while the red bar shows the mean values for the year 2023. Panel A presents the statistics for the tenure track faculty; Panel B presents the statistics for the tenured faculty; Panel C presents the statistics for the untenured faculty; Panel D presents the statistics for all faculty. We include only those schools that exist in both the 2022 and 2023 surveys and where race responses are consistent (i.e., where total faculty reported equals the sum of faculty in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories). We drop the "Native" and "Pacific" categories because both years in the sample have zero values.

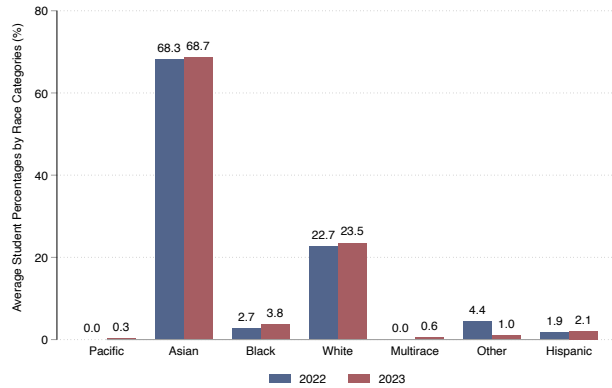

Figure 7. Faculty Percentages by Race/Ethnicity Categories in 2022 and 2023, below Top 50

The figure shows the faculty percentage by race/ethnicity categories in 2022 and 2023 for the subsample of schools ranked 51 and higher ("below Top 50"). The school rank is based on the average of the US News and UT Dallas rank. If either rank is missing, the available rank is used. The x-axis represents the race categories. The y-axis represents the average faculty percentages. The blue bar shows the mean values for the year 2022, while the red bar shows the mean values for the year 2023. Panel A presents the statistics for the tenure track faculty; Panel B presents the statistics for the tenured faculty; Panel C presents the statistics for the untenured faculty; Panel D presents the statistics for all faculty. We include only those schools that exist in both the 2022 and 2023 surveys and where race responses are consistent (i.e., where total faculty reported equals the sum of faculty in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories). We drop the "Native" and "Pacific" categories because both years in the sample have zero values.

Panel A: All Students

Panel B: First Year Students

Panel C: Graduating Students

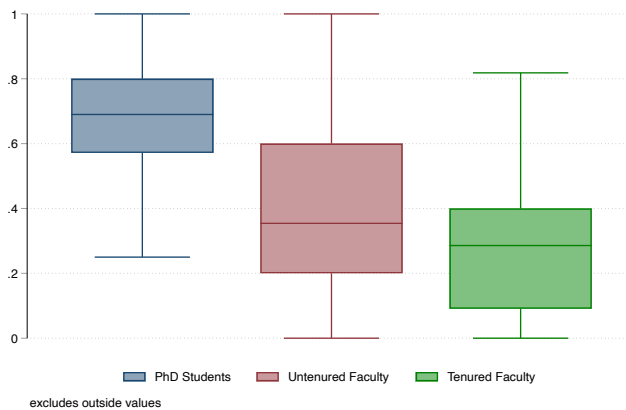

Figure 8. PhD Student Percentages by Race/Ethnicity Categories in 2022 and 2023

The figure shows the percentages of PhD students by race/ethnicity in 2022 and 2023. The x-axis represents the PhD student categories. The y-axis represents the average student percentages by categories. The blue bar shows the mean values for the year 2022, while the red bar shows the mean values for the year 2023. We include only those schools that exist in both the 2022 and 2023 surveys and where race responses are consistent (i.e., where total students reported equals the sum of students in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories). We drop the "Native" categories because both years in the sample have zero values.

Panel A: White

Panel B: Asian

Panel C: Underrepresented Minority

Figure 9. Pipeline of Faculty and PhD Students, by Race/Ethnicity

The figure shows percentages of faculty and PhD students, by race/ethnicity. Each box presents the interquartile range. The line within the box is the sample median. The top (bottom) whisker on the adjacent lines is the observation that is closest to the 75th (25th) percentile plus 1.5 times the interquartile range. Observations outside the endpoints of adjacent lines are excluded. Panel A shows White Faculty; Panel B shows Asian faculty; Panel C shows underrepresented minority faculty (the sum of Black, Hispanic, American Indian, Native Hawaiian/Pacific Islander, Two or More Races, and Other).

Appendix

Table A1. Gender Composition of Finance Departments, Comparing Numbers of Faculty in 2022 and 2023

This table compares the gender composition of faculty in finance departments at respondents' institutions in 2022 and 2023. Panel A presents the statistics for the tenure track faculty; Panel B presents the statistics for the tenured faculty; Panel C presents the statistics for the untenured faculty; Panel D presents the statistics for all faculty. We include only those schools that exist in both the 2022 and 2023 surveys and where gender responses are consistent (i.e., where total faculty reported equals the sum of men, women, and other gender).

	Number of Faculty - 2023						Number of Faculty - 2022

A.2

⁹Percents exclude three schools reporting zero untenured faculty.

Table A3. Gender Composition of Finance Departments, Top 50, Comparing Numbers of Faculty in 2022 and 2023

This table compares the gender composition of faculty in finance departments at respondents' institutions for the subsample of schools ranked 1-50 ("Top 50") in 2022 and 2023. Top 50 is based on the average of the US News and UT Dallas rank. If either rank is missing, the available rank is used. Panel A presents the statistics for the tenure track faculty; Panel B presents the statistics for the tenured faculty; Panel C presents the statistics for the untenured faculty; Panel D presents the statistics for all faculty. We include only those schools that exist in both the 2022 and 2023 surveys and where gender responses are consistent (i.e., where total faculty reported equals the sum of men, women, and other genders).

Table A7. Student Gender Composition, Comparing Number of Students in 2022 and 2023

This table compares the gender composition of PhD students in finance departments at respondents' institutions in 2022 and 2023. Panel A presents the statistics for all PhD students; Panel B presents the statistics for first year PhD students; Panel C presents the statistics for graduating PhD students. We include only those schools that exist in both the 2022 and 2023 surveys and where gender responses are consistent (i.e., where total students reported equals the sum of men, women, and other gender).

	Number of Students - 2023						Number of Students - 2022

Table A8. Student Gender Composition, Comparing Percentages of Students in 2022 and 2023

This table compares the gender composition of PhD students in finance departments at respondents' institutions in 2022 and 2023. Panel A presents the statistics for all PhD students; Panel B presents the statistics for first year PhD students; Panel C presents the statistics for graduating PhD students. We include only those schools that exist in both the 2022 and 2023 surveys and where gender responses are consistent (i.e., where total students reported equals the sum of men, women, and other gender).

	Percent of Total Students (%) - 2023						Percent of Total Students (%) - 2022

A.8

¹¹Percents exclude five schools with no first year PhD students.

¹²Percents exclude eight schools with no graduating PhD students.

Table A9. Race/Ethnicity Composition of Finance Departments, Comparing Numbers of Faculty in 2022 and 2023

This table compares the race/ethnicity composition of faculty in finance departments at respondents' institutions in 2022 and 2023. Panel A presents the statistics for the tenure track faculty; Panel B presents the statistics for the tenured faculty; Panel C presents the statistics for the untenured faculty; Panel D presents the statistics for all faculty. We include only those schools that exist in both the 2022 and 2023 surveys and where race responses are consistent (i.e., where total faculty reported equals the sum of faculty in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories).

¹³Percents exclude three schools reporting zero untenured faculty.

Table A11. Race/Ethnicity Composition of Finance Departments, Top 50, Comparing Numbers of Faculty in 2022 and 2023

This table compares the race/ethnicity composition of faculty in finance departments at respondents' institutions in 2022 and 2023 for the subsample of schools ranked 1-50 ("Top 50"). Top 50 is based on the average of the US News and UT Dallas rank. If either rank is missing, the available rank is used. Panel A presents the statistics for the tenure track faculty; Panel B presents the statistics for the tenured faculty; Panel C presents the statistics for the untenured faculty; Panel D presents the statistics for all faculty. We include only those schools that exist in both the 2022 and 2023 surveys and where race responses are consistent (i.e., where total faculty reported equals the sum of faculty in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories).

Table A12. Race/Ethnicity Composition of Finance Departments, Top 50, Comparing Percentages of Faculty in 2022 and 2023

This table compares the race/ethnicity composition of faculty in finance departments at respondents' institutions in 2022 and 2023 for the subsample of schools ranked 1-50 ("Top 50"). Top 50 is based on the average of the US News and UT Dallas rank. If either rank is missing, the available rank is used. Panel A presents the statistics for the tenure track faculty; Panel B presents the statistics for the tenured faculty; Panel C presents the statistics for the untenured faculty; Panel D presents the statistics for all faculty. We include only those schools that exist in both the 2022 and 2023 surveys and where race responses are consistent (i.e., where total faculty reported equals the sum of faculty in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories).

¹⁴Percents exclude three schools reporting zero untenured faculty.

Table A15. Student Race/Ethnicity Composition, Comparing Number of Students in 2022 and 2023

This table compares the race/ethnicity composition of PhD students in finance departments at respondents' institutions in 2022 and 2023. Panel A presents the statistics for all PhD students; Panel B presents the statistics for first year PhD students; Panel C presents the statistics for graduating PhD students. We include only those schools that exist in both the 2022 and 2023 surveys and where race responses are consistent (i.e., where total students reported equals the sum of students in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories).

Table A16. Student Race/Ethnicity Composition, Comparing Percentages of Students in 2022 and 2023

This table compares the race/ethnicity composition of PhD students in finance departments at respondents' institutions in 2022 and 2023. Panel A presents the statistics for all PhD students; Panel B presents the statistics for first year PhD students; Panel C presents the statistics for graduating PhD students. We include only those schools that exist in both the 2022 and 2023 surveys and where race responses are consistent (i.e., where total students reported equals the sum of students in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories).

	Percent of Total Students (%) - 2023						Percent of Total Students (%) - 2022					
	N	Mean	Std. Dev.	25th Perc.	Median	75th Perc.	N	Mean	Std. Dev.	25th Perc.	Median	75th Perc.

¹⁵Percents exclude five schools with no first year PhD students.

¹⁶Percents exclude nine schools with no graduating PhD students.

Figure A1. Change in Average Percent of Women Faculty from 2022 to 2023

The figure shows the changes in average percentages of female faculty from 2022 to 2023. The change in the average percentage of female faculty equals the average percentage of female faculty in 2023 minus the percentage in 2022. The x-axis represents the tenure track categories. The y-axis represents the change in the average percentage of female faculty. The blue bar shows the statistics for all institutions in the sample. The red bar shows the statistics for the subsample of schools ranked 1-50 ("Top 50"). The green bar shows the statistics for the subsample of schools ranked 51 and higher ("below Top 50"). "Top 50" and "below Top 50" are based on the average of the US News and UT Dallas rank. If either rank is missing, the available rank is used. We include only those schools that exist in both the 2022 and 2023 surveys and where gender responses are consistent (i.e., where total faculty reported equals the sum of men, women, and other genders).

Figure A2. Change in Women PhD Student Percentages from 2022 to 2023

The figure shows the changes in female PhD student percentages from 2022 to 2023. The y-axis represents the change in average women student percentages. The blue bar presents the change among all PhD students. The green bar presents the change among first year PhD students. The red bar presents the change among graduating students. We include only those schools that exist in both the 2022 and 2023 surveys and where gender responses are consistent (i.e., where the total student number reported equals the sum of men, women, and other genders).

Figure A3. Change in Average Faculty Percentages by Race/Ethnicity Categories from 2022 to 2023

The figure shows the changes in average faculty percentages by race/ethnicity categories from 2022 to 2023. The change in the average faculty percentages equals the average percentage of the faculty in a race category in 2023 minus the percentage in 2022. Panel A presents the statistics for the tenure track faculty; Panel B presents the statistics for the tenured faculty; Panel C presents the statistics for the untenured faculty; Panel D presents the statistics for all faculty. The x-axis represents the race categories. The y-axis represents the change in the average faculty percentages. The blue bar shows the statistics for all institutions in the sample. The red bar shows the statistics for the subsample of schools ranked 1-50 ("Top 50"). The green bar shows the statistics for the subsample of schools ranked 51 and higher ("below Top 50"). "Top 50" and "below Top 50" are based on the average of the US News and UT Dallas rank. If either rank is missing, the available rank is used. We include only those schools that exist in both the 2022 and 2023 surveys and where race responses are consistent (i.e., where total faculty reported equals the sum of faculty in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories). We drop the "Native" and "Pacific" categories because both years in the sample have zero values.

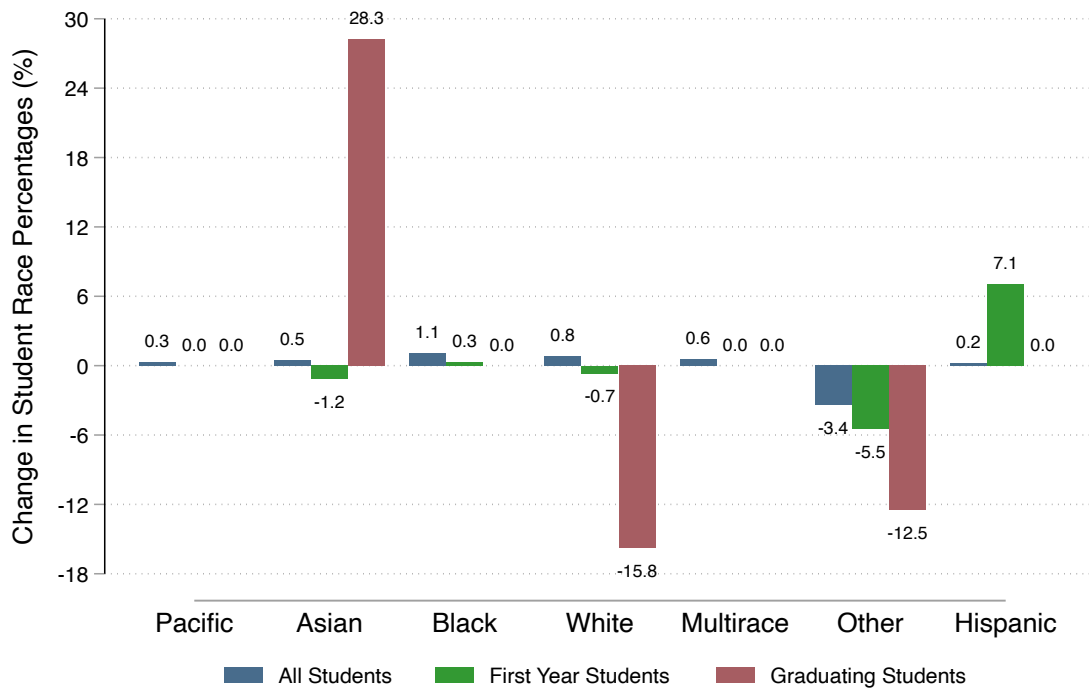

Figure A4. Change in PhD Student Percentages by Race/Ethnicity Categories from 2022 to 2023

The figure shows the changes in female PhD student percentages from 2022 to 2023. The y-axis represents the change in average women student percentages. The blue bar presents the change among all PhD students. The green bar presents the change among first year PhD students. The red bar presents the change among graduating students. We include only those schools that exist in both the 2022 and 2023 surveys and where race responses are consistent (i.e., where total students reported equals the sum of students in the mutually exclusive U.S. Equal Employment Opportunity race/ethnicity categories). We drop the "Native" categories because both years in the sample have zero values.
